

Assignment 1

IT3040 – ITPM
Semester 1

Group No :	REG/WD/02		
Brief description of the project	<p>With the ease of covid-19 restrictions, people have started travelling more often with their family and friends. The tourism industry has also seen gradual growth in the past few months. Resulting in more people using public transportation. Booking a seat on a bus is a difficult task. To smooth the process our team has come up with the idea of a Bus Ticket Booking Management System.</p> <p>We have identified 4 main functions of the system as,</p> <ol style="list-style-type: none">1. User Management2. Schedule Management3. Booking Management4. Admin Management <p>We have focused our system on buses which travel long distances and have not considered the payment part of the system. Since it's more convenient for the bus operators to collect cash on the spot. Therefore, users do not need to worry about cash refunds. This also makes our system more reliable.</p>

Customer_name	Route_name	Bus_number	Date	Start_time	End_time	Capacity	Booked_seats	Total_revenue	Actions
Sam	Colombo-Kandy	B2001	07-MAR-2022	8:00am	11:30am	30	28	Rs.9800	<div>Print</div>
Lilly	Colombo-Galle	B2003	08-MAR-2022	8:00am	10:00am	30	30	Rs.5100	<div>Print</div>

Purpose : This interface shows all the feedbacks placed by users.

Flow: Once the admin user clicks on the 'Feedbacks' tab he/she will be directed to this interface.

Good practices:

- I have given meaningful label names which starts with a capital letter, also I have made sure that there are no spelling mistakes.
- The interface is focused on a single task, which is viewing all the user feedbacks.
- I have used common names for the labels to make it more user friendly rather than using

Brief description of interface 4

Purpose : This interface shows the report generation options of the system.

Flow: When the admin user needs to generate a full report of the system, he/she must click on the 'Generate Report' button. If the admin user wishes to get only the information of a single row, he/she can click on the 'Print' button and get the information of the needed row.

Good practices:

- I have given meaningful label names which starts with a capital letter, also I have made sure that there are no spelling mistakes.
- The interface is focused on a single task, which is generating reports.
- I have made the components

Assignment 1

IT3040 – ITPM

Semester 1

<h2>Sprint 2</h2>	Picture of the interface_5	Brief description of interface_5
		<p>Purpose : This interface shows all the details of the registered users.</p> <p>Flow: The admin user can search a record in the table using the search option. Using the given two icons, admin users can view and delete records from the system.</p> <p>Good practices:</p> <ul style="list-style-type: none"> ▪ I have given meaningful label names which starts with a capital letter, also I have made sure that there are no spelling mistakes. ▪ When hover over to one of the icons it displays the action as a clue (When hovered over to the eye icon, a text saying ‘view’ will appear). ▪ I have made the components (buttons, labels etc.) large enough to increase user accessibility.

Assignment 1

IT3040 – ITPM

Semester 1

Sprint 2

The screenshot shows a web interface for a bus schedule. At the top left is a placeholder for a logo. Below it is a navigation bar with links: Home, Book Ticket, My Bookings, My Profile, and Log out. The main content area features a table with the following columns: Bus Number, Bus Type, From, To, Depature Time, Reaching Time, Price, and Action. The first row of data shows: 01, Normal, Colombo, Kandy, 08:00, 12:00, LKR 200, and a 'Book' button. Below the table are links for 'About Us', 'Follow Us', and 'Contact'.

Bus Number	Bus Type	From	To	Depature Time	Reaching Time	Price	Action
01	Normal	Colombo	Kandy	08:00	12:00	LKR 200	Book

Purpose : This interface will be used to view bus schedule.

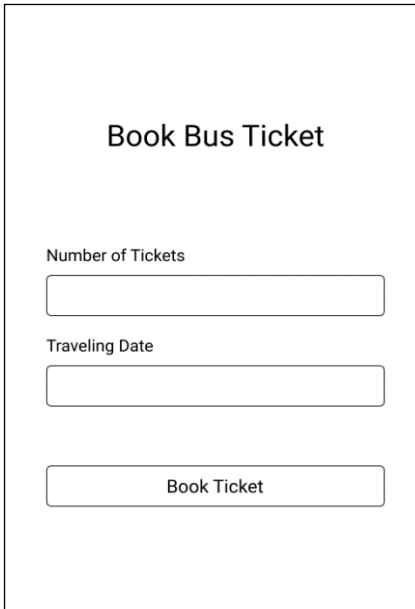

Flow: User will be redirected to this interface after clicking the 'Book Ticket' button on navigation bar. User can view the bus route details and they can click 'Book' button to go to the ticket booking interface.

Good practices:

- It is ensured that this interface has only one primary focus which is viewing bus schedule.
- The labels were given meaningful names and the first letter of each word was capitalized. It was made sure that there was no spelling mistake.
- Words used in this interface are easy to read and understand. No complex or system-oriented words used.

Picture of the interface_6

Brief description of interface_6

The screenshot shows a form titled 'Book Bus Ticket'. It contains two input fields: 'Number of Tickets' and 'Traveling Date'. Below these fields is a 'Book Ticket' button.

Purpose : This interface will be used to book bus ticket.

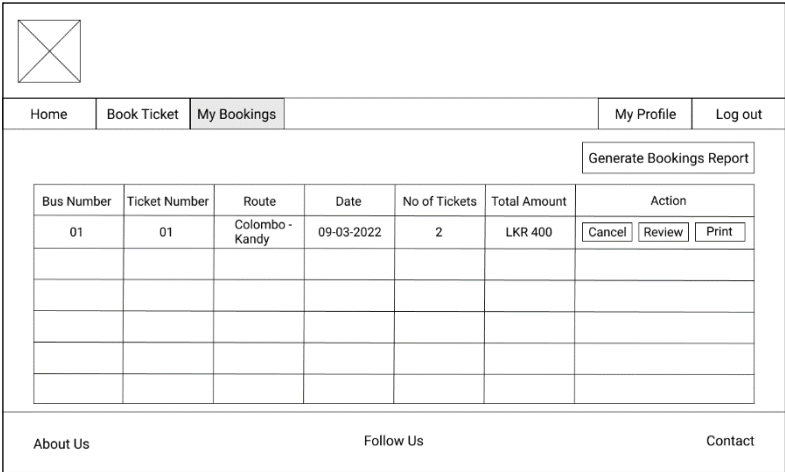

Flow: After choosing the bus user need to enter number of tickets and traveling date. After entering the required values, user needs to click 'Book Ticket' button to book bus ticket.

Good practices:

- This interface has given a meaningful title.
- Without asking the user to type-in values, they were given the option to choose

Assignment 1

IT3040 – ITPM
Semester 1

		<p>the number of tickets and traveling date.</p> <ul style="list-style-type: none"> It is ensured that the users do not have to think or work too hard to use an interface.
	Picture of the interface_7	Brief description of interface_7
		<p>Purpose : This interface will be used to view users booking history and do necessary actions.</p> <p>Flow: After viewing the booking details user can print the bus ticket. After the journey user can give a review. If user want to cancel their booking they can click ‘Cancel’ button. Also, user can generate a detailed report about their booking details by clicking ‘Generate Bookings Report’ button.</p> <p>Good practices:</p> <ul style="list-style-type: none"> The labels were given meaningful names and the first letter of each word was capitalized. It was made sure that there was no spelling mistake. Words used in this interface are easy to read and understand. No complex or system-oriented words used. It is ensured that the users do not have to think or work too hard to use an interface.

	Picture of interface 1	Brief description of interface 1

Assignment 1

IT3040 – ITPM

Semester 1

Sprint 1

The screenshot shows a web application titled "Bus Booking Management System". It has a navigation bar with buttons for "Home", "Schedule", "Booked List", "Maintenance", and "Admin". The "Add New Route" form is the central focus, containing input fields for "City", "District", and "Province", along with "Save" and "Cancel" buttons. To the right, there is a table with columns "Province" and "Action". The table lists "Central", "Southern", and "Western" provinces, each with "Edit" and "Delete" buttons. A "Search" button is also present.

Picture of interface 2

Purpose : This interface will be used to add new routes to the system.

Flow: Initially, the user is required to enter the name of city, district, and province. After entering the required values, user needs to click on the 'save' button to save the entered data. If the user needs to exit the menu without entering any data, he can click on the 'cancel' button.

Good practices:

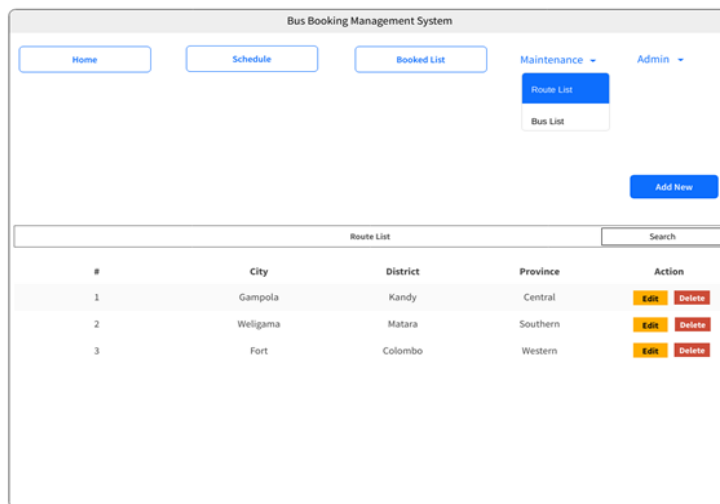

- This interface was designed by focusing on one specific task, which is the addition of adding the routes.
- The labels were given meaningful names, and the first letter of each word was capitalized, in addition, it was made sure that there are no spelling mistakes.
- Ensure that the users do not have to think or work too hard for enter the values.

Brief description of interface 2

Assignment 1

IT3040 – ITPM

Semester 1

#	City	District	Province	Action
1	Gampola	Kandy	Central	Edit Delete
2	Weligama	Matara	Southern	Edit Delete
3	Fort	Colombo	Western	Edit Delete

Purpose : This interface will be used to display the routes by list and search the routes.

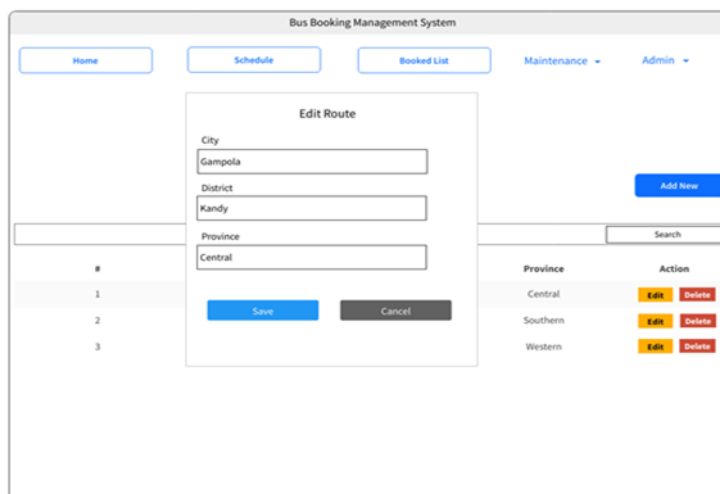

Flow: User wants to get any specific data then he can search the data by ID or name.

Good practices:

- This interface was designed by focusing on one specific task, which is the addition of searching the routes.
- In the search operation, user can search by id or name (when user have start typing, system listing that names by order of the letters). So, user feels easy to search.
- Keep the interfaces simple. An interface should not contain irrelevant information.

Picture of interface 3

Brief description of interface 3

Purpose : This interface will be used to edit the routes in the system.

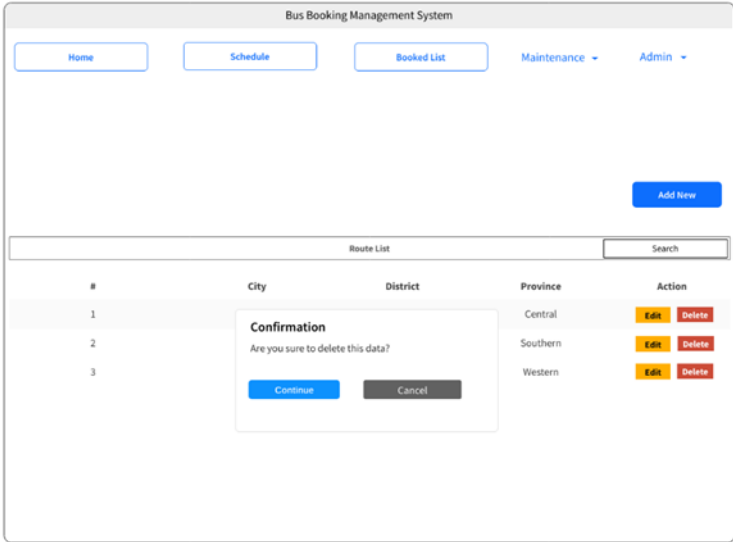

Flow: If the user needs to edit any value, then click the 'edit' button and do the changes which they want, after click on the 'save' button for update.

Good practices:

- This interface was designed by focusing on one specific task, which is the addition of edit the routes.
- Users do not have to think or work too hard to use an interface.

Assignment 1

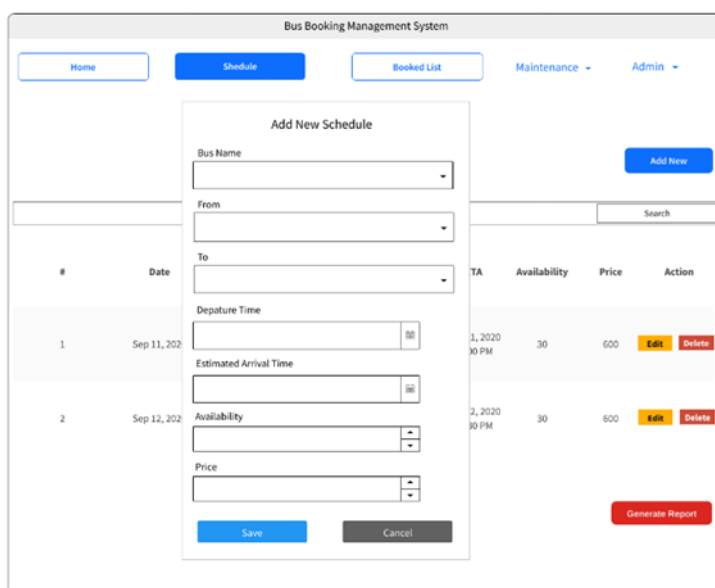

IT3040 – ITPM
Semester 1

		<ul style="list-style-type: none"> Interactive components that are large enough.
	Picture of interface 4	Brief description of interface 4
	 <p>The screenshot shows a web application titled 'Bus Booking Management System'. It has a navigation bar with buttons for 'Home', 'Schedule', 'Booked List', 'Maintenance', and 'Admin'. There is an 'Add New' button on the right. Below the navigation bar is a 'Route List' table with columns: #, City, District, Province, and Action. The table contains three rows of data. A confirmation dialog box is overlaid on the table, asking 'Are you sure to delete this data?' with 'Continue' and 'Cancel' buttons.</p>	<p>Purpose : This interface will be used to delete the routes.</p> <p>Flow: If the user wants to delete any value, then he needs to click on the 'delete' button. After system asks confirmation and user is required to click on the 'continue button' for delete the value.</p> <p>Good practices:</p> <ul style="list-style-type: none"> This interface was designed by focusing on one specific task, which is the addition of delete the route. When the user clicks the 'delete' button, system asks confirmation for delete that value. This option is important for preventing accidental deletion of data. Used words that are easy to read and understand, without using complex or system-oriented words.
	Picture of the interface_5	Brief description of interface_5

Assignment 1

IT3040 – ITPM
Semester 1

Sprint 2

The screenshot shows the 'Bus Booking Management System' interface. At the top, there are navigation tabs: Home, Schedule (active), Booked List, Maintenance, and Admin. Below the tabs, there is a search bar and a table of schedules. The 'Add New Schedule' form is open, showing fields for Bus Name, From, To, Departure Time, Estimated Arrival Time, Availability, and Price. The form has 'Save' and 'Cancel' buttons. The table below the form lists two schedules:

#	Date	TA	Availability	Price	Action
1	Sep 11, 202	1, 2020 90 PM	30	600	Edit Delete
2	Sep 12, 202	2, 2020 90 PM	30	600	Edit Delete

At the bottom right of the interface, there is a 'Generate Report' button.

Picture of the interface_6

Brief description of interface_6

Purpose : This interface will be used to add new schedules to the system.

Flow: Initially, the user is required to select the bus name, locations, times, available seat count and price. After entering the required values, user needs to click on the 'save' button to save the entered data. If the user needs to exit the menu without entering any data, he can click on the 'cancel' button.

Good practices:

- This interface was designed by focusing on one specific task, which is the addition of adding the schedules.
- The labels were given meaningful names, and the first letter of each word was capitalized, in addition, it was made sure that there are no spelling mistakes.
- Without asking the users to type in values, they were given the option to choose the bus name, location, time, available seat count and price from the drop-down lists.

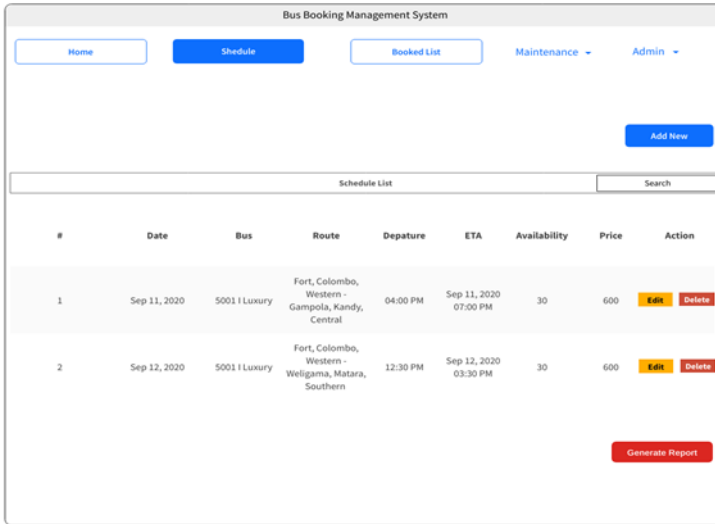

Purpose : This interface will be used to display the schedules by list, search the schedules and generate a report.

Flow: User wants to get any specific data then he can search the data by ID or name. Also, user can generate a report by click on the 'Generate Report' button.

Assignment 1

IT3040 – ITPM

Semester 1

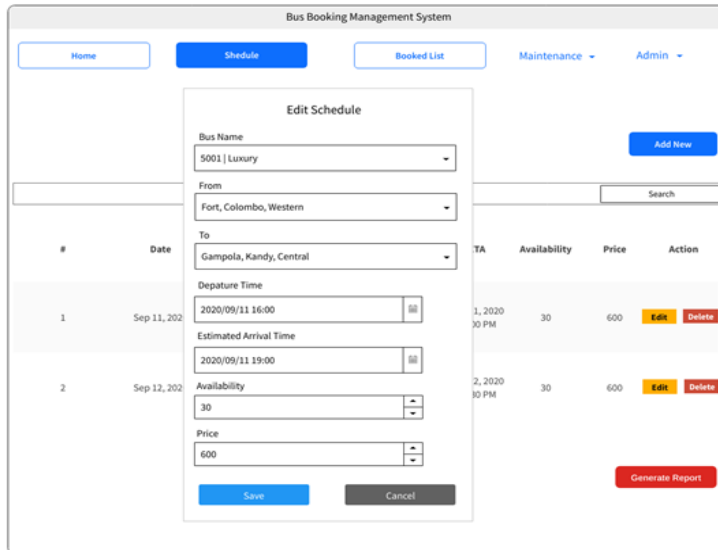

#	Date	Bus	Route	Departure	ETA	Availability	Price	Action
1	Sep 11, 2020	5001 Luxury	Fort, Colombo, Western - Gampola, Kandy, Central	04:00 PM	Sep 11, 2020 07:00 PM	30	600	Edit Delete
2	Sep 12, 2020	5001 Luxury	Fort, Colombo, Western - Weligama, Matara, Southern	12:30 PM	Sep 12, 2020 03:30 PM	30	600	Edit Delete

Good practices:

- Components used in the interface (buttons, labels, etc.) are large enough to interact.
- In the search operation, user can search by id or name (when user have start typing, system listing that names by order of the letters). So, user feels easy to search.
- Ensure that the users do not have to think or work too hard to use an interface.

Picture of the interface_7

Brief description of interface_7

#	Date	Bus	Route	Departure	ETA	Availability	Price	Action
1	Sep 11, 2020	5001 Luxury	Fort, Colombo, Western - Gampola, Kandy, Central	2020/09/11 16:00	1, 2020 30 PM	30	600	Edit Delete
2	Sep 12, 2020	5001 Luxury	Fort, Colombo, Western - Weligama, Matara, Southern	2020/09/11 19:00	2, 2020 30 PM	30	600	Edit Delete

Purpose : This interface will be used to edit the schedules in the system.

Flow: If the user needs to edit any value, then click the 'edit' button and do the changes which they want, after click on the 'save' button for update.

Good practices:

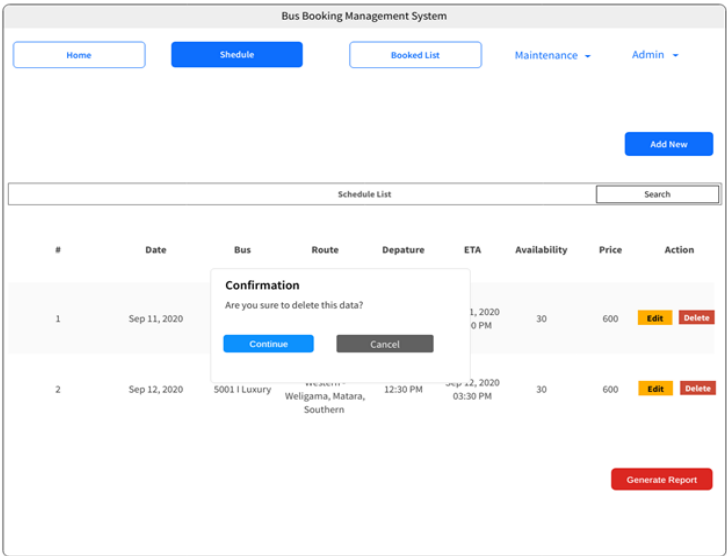

- This interface was designed by focusing on one specific task, which is the addition of edit the schedule.
- Without asking the users to type in values, they were given the option to choose from the drop-down lists.
- Fill the date and time from the date picker.
